THIS YEAR, we're hitting the road to emphasize the value of soil and the diversity and importance of local efforts in agriculture. We'll see how things may begin and are bolstered in rural areas and then how those efforts may be realized, enhanced and delivered to the urban/industrial scene, all while staying LOCAL!

Prepare for an informative and FUN 2 day workshop that will include activities and resources for grades K-12 and will align with Ohio Academic Standards and curriculum.

On Day 1, we'll meet up at the Shelby SWCD office then travel through the countryside visiting a local vineyard as well as check out the science behind how things grow. On Day 2, we'll meet at Possum Creek Metro Park in Dayton then take a look at urban gardens smack dab in the middle of the big ol' city and the charming and bustling 2nd Street Market. There's more, too! We think you'll enjoy the trip and we look forward to another valuable and enlightening EDUCATORS WORKSHOP!
